CAREER OBJECTIVE

Backend Developer with 1.5+ years of experience in building scalable web applications using Laravel and PHP. Skilled in designing REST APIs, optimizing database performance, and implementing business logic for real-world applications. Experienced in handling large datasets, automation workflows, and third-party integrations such as Shopify.

EXPERIENCE

Associate Developer

Aug 2024 – Present

Appycodes, Siliguri, West Bengal, India

- Developed and maintained backend systems using Laravel, CodeIgniter, and Node.js.
- Designed RESTful APIs for mobile applications, improving response handling and reducing frontend dependency on redirects
- Managed deployments using Laravel Forge, including server provisioning, Nginx configuration, SSL setup, and application deployment workflows.
- Implemented bulk data processing using chunking, queues, and optimized database queries.
- Automated Shopify inventory and pricing updates using GraphQL APIs.
- Built admin dashboards and business logic modules for order and user management.

Software Developer Intern

Jan 2024 – Jul 2024

Technowebs, Siliguri, West Bengal, India

- Developed backend features and API for e-commerce in Laravel.
- Designed database schemas and integrated third-party APIs.
- Maintained static websites, software, and applications, ensuring their functionality and performance.

TECHNICAL SKILLS

- **Languages:** PHP, SQL, JavaScript.
- **Frameworks:** Laravel, CodeIgniter, Express.js.
- **Database:** MySQL, PostgreSQL.
- **Tools:** Git, Postman, VS Code, Antigravity.
- **Concepts:** REST APIs, Authentication, Authorization, Queues, Database Optimization.
